

Market Partners Eco. proudly presents BIOFASE,
a **smarter** solution to a global problem.

We are the first non-food based bioplastic resin. This means we are not using food sources such as corn or potato, which could be used for feed. We use the avocado pit agrowaste as a raw material, from which we extract the bio-polymer through our patented technology.

The avocado is a magical fruit, it is delicious and offers an enormous amount of nutrients that benefit our health. However, for many years its seed kept a big secret that can save our planet from plastic contamination.

CUTLERY

Item#	Description	Case Pack	Net Case Wt	TI X HI
95206	Fork: 5 Pcks of 200 pcs ea.	5/200ct	11 lbs	16x10
